Number : 24.11.2006
Subject : Support letter for TUROGE 2007.

November 07, 2006

Dear Exhibitors and Delegates of the TUROGE 2007,

On behalf of the Turkish Association of Petroleum Geologists it is our pleasure to welcome you at the 6th Turkish and Black Sea International Oil & Gas Showcase and Conference TUROGE 2007 in Ankara, on 27 – 29 March, 2007.

TUROGE has been traditionally considered as the forum where oil and gas decision makers are discussing the major issues of the industry, including exploration and production of the Caspian and Black Sea region, transportation to the European consumers and collaboration with the Middle East countries' markets. They are also given a chance to present their latest technology at the exhibition.

As you know gas has been recently discovered in the Turkish part of the Black Sea which provides a new opportunity for the E&P businesses in the country. This will start the new era of off-shore exploration in Turkey and be a significant chance for the global oil & gas operators to come and invest in the region.

The country attracts the companies' attention for the last 15 years, so you will be able to meet and exchange your views with the veterans of the Turkish oil & gas and transportation sectors, talk about the advantages and bottlenecks of working in the country.

I am sure the Conference will allow you to share experience for future planning in upstream and downstream oil business in the Caspian and Black Sea Region.

Kind regards,

İsmail Bahtiyar
President, Turkish Association of Petroleum Geologists
